

## Why, How and What Oak Hill's Maths Curriculum

### **Why**

- Strong understanding of mathematical concepts.
- To help children link understanding to real life situations.
- Prepare children for further mathematical challenge.
- For children to be passionate about maths.

### **How**

- High-quality teaching and feedback to allow the children to make the best possible progress.
- To provide challenge within every area of maths in their specific years' NC.
- Empower children to face difficulties head-on in maths.

### **What**

- Assessment information is used to develop learning and challenge understanding.
- High-quality feedback is given to inspire and improve on knowledge.
- Subject knowledge is accurate and efficiently shared with enthusiasm for Maths.
- Positive encouragement is given to drive pupils desire to develop their understanding.
- Cross curricular opportunities are given to explore maths in various ways.
- Provide children with an attitude of accepting trial and error in mathematical situations.
- Teachers are supported by the Maths lead.
