

# Please support your school and the steps they are taking to protect your children

We are advising schools to take extra action to help tackle rising Covid cases. The steps taken will vary from school to school and are likely to include some of the below. Please support them and the measures they put in place.

Face coverings in communal areas and classrooms for secondary school pupils

Face coverings for staff when indoors

Parents and carers may also be asked to wear a face covering in crowded areas for example at the school gates

Cancelling large events or moving them outdoors

Postponing indoor 'all school activities' including assemblies

Daily rapid Covid testing for household siblings aged 11 years and over

Rapid Covid testing for household siblings of a confirmed case

Lateral flow testing (LFT) for primary aged children might be advised but will be at the discretion of parents or carers.

There is a national shortage of school supply staff, which means classes may be sent home if there is not enough cover. If this happens your child will be offered remote learning.

## Here are the steps you can take to help prevent your child from catching and spreading COVID-19:

Get vaccinated. This remains the best way to protect yourself and your family from the serious affects of COVID-19. If you or your child are eligible for a Covid jab please do not delay in taking up the offer

Wear a face covering in crowded and enclosed spaces including public transport

If your child has symptoms of Covid or has tested positive using a lateral flow device get a PCR test and keep them at home until you receive your results. If your child or anyone in your household tests positive for COVID-19 they must stay at home and isolate for ten days. This means not going to work, school or any other public places. Close contacts of a positive case will be contacted by NHS Test and Trace and will be advised to take a PCR
